

Fig 1

FIG. 1 is a perspective view of a multi-layered ring assembly 10, showing an outer ring 11, an inner ring 12, and a central ring 13. The assembly is shown in a disassembled state, with the rings separated from each other. The outer ring 11 has a flange 14 and a central opening 15. The inner ring 12 has a flange 16 and a central opening 17. The central ring 13 has a flange 18 and a central opening 19. The rings are shown in a perspective view, with the outer ring 11 being the largest and the inner ring 12 being the smallest. The central ring 13 is positioned between the outer ring 11 and the inner ring 12. The rings are shown in a disassembled state, with the rings separated from each other. The outer ring 11 has a flange 14 and a central opening 15. The inner ring 12 has a flange 16 and a central opening 17. The central ring 13 has a flange 18 and a central opening 19. The rings are shown in a perspective view, with the outer ring 11 being the largest and the inner ring 12 being the smallest. The central ring 13 is positioned between the outer ring 11 and the inner ring 12. The rings are shown in a disassembled state, with the rings separated from each other.
